

Multidimensional Performance Radar Across 6 Standardized System Dimensions

Axis Normalizations: 1. Macro- F_1 in $[0,1]$; 2. Generalization = $1 - \text{Gap}/100$; 3. Lead Time = Days / 25d; 4. Explainability = Cohen's kappa ($n/a = 0$); 5. Speed = $1 - \text{p95 Latency} / 150\text{ms}$; 6. Compactness = $1 - \text{Size} / 25\text{MB}$. Baselines B1/B2/B3 lack physiological attribution mechanisms (plotted as 0, marked n/a).
